Develop Positive Relationships, Run a Healthy Business, Teach Your Children Accurate Thinking Skills

According to Dr. Charles Bailey, we can train our minds to think more accurately. The benefits of doing so are great. Dr. Bailey says, “If we apply cognitive accuracy to our relationships, intimate, social, business, education; we stand a better chance of developing overall positive relationships, running healthy businesses, teaching our children to think more clearly...promoting a better and more likely future for ourselves, our children, and the world.

Charles Bailey is the Executive Director of the Global Institute for Scientific Thinking in Lake Mary, Florida. He received his medical degree from the University of Texas Health Science Center in Houston and did his residency in psychiatry at the University of Florida.

Dr. Bailey will speak at the Institute on Tuesday, October 27th at 6:00 PM. For reservations, please call 352.357.3995 or reserve online at www.lakeeustisinstitute.org. In his talk, Unraveling the Mysteries of the Mind-Brain: Minding the Brain, Dr. Bailey will discuss the three critical behaviors necessary for accurate decisions and judgments:

1. Seeking and using accurate information.
2. Using accurate evaluations and information processing.
3. Processing information here and now.

If you want to minimize the negative effects of inaccurate thinking, come hear what Charles Bailey has to say.

Sampler of Short Stories to Discuss Hemingway’s “A Clean, Well-Lighted Place” Thursday, Oct. 29th

Download this short, short story at www.lakeeustisinstitute.org and come join the discussion of one of Ernest Hemingway’s less well-known stories. The story is mostly a conversation between a young waiter and an older waiter about the need of the elderly for “a light for the night”. The young waiter has youth and confidence, and a job. The older waiter says he lacks everything but a job.

This is a story about intergenerational conflict and the unwillingness of youth to consider that old age comes to almost everyone.
